All,

Per our discussion, please see attached for the revised talking points for Solar Inverters and Set Top Boxes.

I'll be sending out the attendance list later today.

Let us know if you need anything else.

Subject: FOR REVIEW: Title 20 ITP Workshops DRAFT Talking Points

All,

For your review, please see attached for draft talking points for next week's Energy Commission ITP Workshops.

A few notes:

- 1) draft talking points for Spray Sprinkler Bodies will be following later today.
- 2) we anticipate modifications for some topics, but we wanted to provide you with an early draft.
- 3) we have provided a proposed assignment for delivery of the talking points, although some of them still need to be filled in with input from you. We also have new information from the CEC as well that the format of the workshop will involve a facilitated discussion by the Energy Commission involving all of the relevant stakeholders prior to hearing general comments , which means we may want to modify the sequence of these talking points. I'll schedule a meeting with the IOU team for Tuesday to ensure we're aligned on the who, what and when heading into the workshops.

In the meantime, let us know if you have any questions.

I'm out of the office the rest of the afternoon but please feel free to reach out the individual CASE topic leads directly for any high priority items, cc'd here.

Thank you,

Nate
