

MCE Energy Efficiency Programs Monthly Update

Energy Efficiency Mission Statement

MCE's Energy Efficiency program increases the efficiency of energy and water systems within existing and new buildings to reduce environmental impacts and improve health, comfort and safety.

The program empowers communities through local workforce development, and access to educational tools and financial incentives.

Program Achievements – January 2013 to January 2017 (most recent data)

Small Commercial	Single Family	Multifamily
Total Rebates Distributed \$471,795	<u>Solar Rebate Impacts</u> 61 Rebates Distributed	Multifamily Properties Audited 69
Number of Unique Projects Completed 437	\$38,900 Distributed	Number of Units Audited* 6,678
	215 kW of Solar Installed	Total Rebates Distributed \$495,748
	– <u>GRID Partnership</u> – 42 Rebates Distributed	Total Units that received DI 1,619
	~\$1,018,400 estimated bill savings	<i>* Includes one property with over 6,000 units currently receiving common area measures. Outreach to the individual HOAs at this property for additional measures will begin in 2017.</i>
	~2,304 Tons GHG eliminated
