**Subject:** Re: Furnace to HP Switch  
**Date:** Monday, March 16, 2015 11:13:33 AM

---

HP air handler is 220v supply while a furnace is 110. This raises the cost of fuel switching. Did DOE catch this.

Hi Marshall,

I unfortunately will not be able to participate on the call this morning (I will be at the drs office). I included time for discussion of the IOU working group for furnaces. It would be helpful if you could try to get the availability and nail down a time for key folks for a 2 hour call, since I received limited participation in the Doodle poll last week.

Thanks,  
Bijit
