Jan:

We will follow your advice regarding when to speak up.

Food for thought...

Most of AGA membership probably not decoupled

For us... A few issues regarding impacts of not including small furnaces.

- relationship with CEC
- relationship with CPUC
- impacts on ZNE
- impacts on climate change
- loss of savings for multi-family and low income more generally
- RENs
- one time, or is the expectation to align with AGA going forward

Aligning with AGA probably on everything means we should get out of the gas efficiency business from a standards viewpoint

Thank you.

Pat Eilert
