Thanks, Jessica! This is very helpful.

Hi Bo,

Attached is our research for the test labs. The attachment "test labs for tsd" highlights in yellow which test labs have been used within the past year and attachment "tsd submittals" is proof of that. Let me know if you have any questions.

Best,

Jessica

Hi Jessica,

I just updated the appointment notes to notify confirmed interviewees that "a CEC representative may join the call at their discretion". I'll let you know if anyone voices concern.

Thanks,

Bo

I will try to get that done as soon as possible. Also, I just received the invitations for the interviews, did the manufacturers have conditions for the CEC, in terms of participating? If we are only allowed to listen in, that's fine.

Thanks, Jessica. If you can facilitate those data collection attempts, we would be grateful. In the meantime, I will call the test labs who haven't responded to me and will ask manufacturers which labs they use.

Hi Bo,

We currently don't have a query that allows us to determine which test labs were used for a recent submission or test labs that are linked to a manufacturer. I will ask our MAEDBS team if one can be developed, but it could take days. There is another way by going through the submittal applications (see image below) but you would not have access to this. Our team can go through recent submittal applications to determine which test lab was used by the manufacturer, but this can take few days depending on how far we go.

If you questions let me know.

Best,

Jessica

Appliance Submittal Declaration

To meet the requirements of Title 20, companies wishing to certify appliances with the California E contact information for themselves and for the test laboratory used to produce the certification dat following page. If a test lab was not used (for example, if a manufacturer is requesting only that m appropriate exception has been met, the Test Laboratory section may be left blank.

Subject: Organizations who tested and submitted tub spout diverter results to MAEDBS

Hi Jessica,

Might the Energy Commission have documentation indicating which organizations submitted tub spout diverter results to their MAEDBS database? If so, may you please help me obtain that info?

I'm having trouble getting any test labs to confirm interviews with me, even though I emailed every test lab in the Title 20 company directory using the filter of "plumbing fittings" (see attached). Those that have responded stated that they haven't tested tub spout diverters. I will be calling the labs who haven't responded yet, but wanted to see if the Energy Commission might have any handy information.
