Comment #	PA	Page #		Integrated (Y/N)	Rationale for Y/N
ORA-1	SCE	49 fn. 74	<ul style="list-style-type: none"> • Achievable and Technical Potential definition requires an example if used as a metric. <ul style="list-style-type: none"> ○ Achievable Potential is based on Technical Potential with specific assumptions. Metric should include assumptions that define an outcome within the definition of Achievable Potential (i.e. what measures, market influences and barriers are considered). 		
ORA-2	SCE	51	<ul style="list-style-type: none"> • Lacks a reasonable strategy to address anticipated decrease in energy efficiency (EE) portfolio cost effectiveness. <ul style="list-style-type: none"> ○ SCE provides a discussion about cost effectiveness being driven down, but does not describe how anticipated program changes will address the changing cost effectiveness. 		
ORA-3	SCE	53	<ul style="list-style-type: none"> • Table detailing variant service levels specific to agricultural sector is missing. <ul style="list-style-type: none"> ○ SCE plans on delivering different EE services based on customer energy usage profiles. The referenced table detailing these specific strategies is missing. 		
ORA-4	SCE	69-70	<ul style="list-style-type: none"> • Study findings are not incorporated into business plan. <ul style="list-style-type: none"> ○ For example, SCE indicates it plans to explore future strategies related to findings of the MASl and Cannibas studies but does not actually incorporate any targeted strategies into its current business plan. 		
ORA-5	SCE	30	<ul style="list-style-type: none"> • Table of sample strategies and tactics does not provide a clear linkage between identified market barriers and appropriate strategies and tactics. <ul style="list-style-type: none"> ○ Since tactics for commercial, industrial and agricultural sections are all grouped together, it is difficult to determine which sample tactics will be used for which industries and which are to be crosscutting. ORA recommends that SCE change the agricultural section format to make the tactics specific to each industry. 		
ORA-6	SCE		<ul style="list-style-type: none"> • Goals for lack sufficient definition and rigor. <ul style="list-style-type: none"> ○ For example: Energy savings, levelized cost of savings and cost-effectiveness require more sufficient definition and rigor. 		
ORA-7	SCE	55	<ul style="list-style-type: none"> • Strategic initiatives should to be tied to agricultural sector strategies. <ul style="list-style-type: none"> ○ Table 15 does not connect to the strategic initiatives outlined specifically to the industrial sector. Strategies should align with the initiatives proposed in the Business Plan. ○ The agricultural sector includes “samples,” which are insufficient to evaluate the plan and provide meaningful comments. 		
ORA-8	SCE	56	<ul style="list-style-type: none"> • Define the parameters of proposed pilots. <ul style="list-style-type: none"> ○ Proposed pilots should be defined and include descriptions showing how the pilots will operate, how much energy savings are projected and budget estimates.
